

Printable Wear Card

Every vehicle experiences a few bumps along the way, and some wear is considered normal. The Lease-End Guide and the Wear Card will help you identify what is “excess” wear, so you can determine what repairs are needed to avoid excess wear charges.

After printing this card, cut it out and hold it against dents, dings, cracks, chips, stains or tire treads to assess your vehicle’s condition.

Instructions

1. For best results, print this document in Portrait orientation on standard letter size paper (8.5 x 11 inches) using your printer’s “Best Quality” setting. Disable scaling or page-fitting options.¹ The card should measure 6.75 x 2.5 inches.
2. Using scissors, carefully trim along the dotted line.
3. Use the ruler along the bottom to measure your vehicle’s wear.
4. To measure tire tread depth, insert the bottom edge of the card into tire tread. If your vehicle’s tire tread meets normal conditions, the tread depth indicator will not be visible.

¹Refer to your printer’s owner’s manual for more details.

✂ Cut along dotted line.

**FINANCIAL Wear Card**

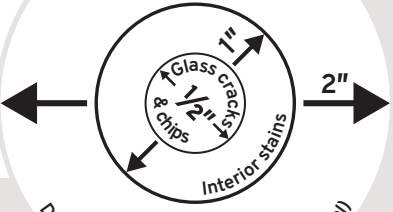

For questions or more information, visit gmfinancial.com/LeaseEnd

Normal wear conditions include:

- Fewer than 4 dings per panel less than 2"
- 1 dent equal to or less than 4" or 1 scratch less than 6" per panel
- Interior cuts and tears less than 1/2"
- Wheel scratches and gouges equal to or less than 3"
- Removable stains and minor carpet wear
- For most tires, tire tread depth of at least 4/32" from the lowest point. When inserting bottom edge of card into tire tread, the blue color indicator should not be visible. Please see your Lease-End Guide for additional important tire information.

4/32" tire tread depth ↑
